## PROFESSIONAL SUMMARY

Gold Medalist Software Engineer with a passion for Artificial Intelligence, Computer Vision, and software development. Experienced in designing and building intelligent applications that combine machine learning, automation, and modern web technologies to solve real-world problems.

## EDUCATION

**Bachelor of Science in Software Engineering (Gold Medalist)**

2022 – 2026

Riphah International University, Lahore

CGPA: **3.77 / 4.00** — Chancellor's (Highest) Honor List: Spring 2024, Fall 2024, Spring 2026

## TECHNICAL SKILLS

**Languages:** Python, C++, Java, JavaScript, SQL

**AI / ML:** PyTorch, TensorFlow, Scikit-Learn, OpenCV, YOLOv8, Deep Learning, Machine Learning, Computer Vision, Object Detection, CNNs

**Web Technologies:** React.js, Next.js, Node.js, Express.js, MongoDB, REST APIs

**Tools:** Git, GitHub, Linux, Postman, VS Code

**Core Concepts:** Data Structures, Algorithms, OOP, Database Design, System Design, Software Architecture

## EXPERIENCE

**Freelance Software Developer**

2024 – Present

- Developed MERN-stack applications, REST APIs, authentication, and database solutions for clients.
- Designed scalable backend architectures and optimized application performance.
- Collaborated directly with stakeholders from requirements gathering through deployment.

**Teaching Assistant — Riphah International University**

2024 – 2025

- Mentored 30+ students in programming, algorithms, debugging, and software engineering concepts.
- Assisted in coursework evaluation, project reviews, and technical problem-solving sessions.

## SELECTED PROJECTS

**HawkEye — AI-Powered Campus Monitoring Platform**

GitHub

*Final Year Project — 1st Position Across All University Batches*

*Python, YOLOv8, OpenCV, React.js, Node.js, MongoDB*

- Developed a web-based AI surveillance platform for automated campus monitoring and violation detection.
- Trained custom YOLOv8 models achieving 90.4% mAP@50, 91.8% recall, and 80.7% precision.
- Built real-time video analysis, dashboard monitoring, and automated alerting workflows.

**Attendify — Face Recognition Attendance System**

GitHub

*Python, CNN, OpenCV, React.js, Node.js, MongoDB*

- Developed a web-based facial-recognition attendance platform for automated student verification and tracking.
- Trained deep learning models achieving over 80% recognition accuracy across real-world testing scenarios.
- Implemented attendance management and reporting workflows, reducing manual effort by over 90%.

**ClassTrack — Smart Examination Monitoring Platform**

GitHub

*Python, YOLOv8, OpenCV, RFID, React.js, Node.js, MongoDB*

- Built a web-based examination monitoring platform integrating RFID verification and computer vision.
- Trained YOLOv8 models to detect suspicious examination behavior with over 80% accuracy.
- Developed real-time monitoring and anomaly reporting workflows, reducing manual invigilation effort by 60%.

## ACHIEVEMENTS

- Winner — TechFest 2024 Speed Programming Competition.
- TOEFL iBT Score: **100/120** (CEFR C1).
- Completed 30+ certifications in Artificial Intelligence, Machine Learning, Python, and Software Engineering.
